

FEATURES

- **Controlled Baseline**
 - One Assembly/Test Site, One Fabrication Site
- **Extended Temperature Performance of –55°C to 125°C**
- **Enhanced Diminishing Manufacturing Sources (DMS) Support**
- **Enhanced Product Change Notification**
- **Qualification Pedigree** ⁽¹⁾
- **Fast Response Times**
- **Strobe Capability**
- **Maximum Input Bias Current . . . 300 nA**
- **Maximum Input Offset Current . . . 70 nA**
- **Can Operate From Single 5-V Supply**

- (1) Component qualification in accordance with JEDEC and industry standards to ensure reliable operation over an extended temperature range. This includes, but is not limited to, Highly Accelerated Stress Test (HAST) or biased 85/85, temperature cycle, autoclave or unbiased HAST, electromigration, bond intermetallic life, and mold-compound life. Such qualification testing should not be viewed as justifying use of this component beyond specified performance and environmental limits.

DESCRIPTION/ORDERING INFORMATION

The LM211-EP is a single high-speed voltage comparator. This device is designed to operate from a wide range of power-supply voltages, including ± 15 -V supplies for operational amplifiers and 5-V supplies for logic systems. The output levels are compatible with most TTL and MOS circuits. This comparator is capable of driving lamps or relays and switching voltages up to 50 V at 50 mA. All inputs and outputs can be isolated from system ground. The outputs can drive loads referenced to ground, V_{CC+} or V_{CC-} . Offset balancing and strobe capabilities are available, and the outputs can be wired-OR connected. If the strobe is low, the output is in the off state, regardless of the differential input.

ORDERING INFORMATION

T _A	V _{IO} max AT 25°C	PACKAGE ⁽¹⁾		ORDERABLE PART NUMBER	TOP-SIDE MARKING
–40°C to 125°C	3 mV	SOIC – D	Tape and reel	LM211QDREP	LM211E
–55°C to 125°C	3 mV	SOIC – D	Tape and reel	LM211MDREP	LM211M

- (1) Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

LM211-EP DIFFERENTIAL COMPARATOR WITH STROBES

SLCS140A-DECEMBER 2002-REVISED MAY 2006

FUNCTIONAL BLOCK DIAGRAM

SCHEMATIC

All resistor values shown are nominal.

Absolute Maximum Ratings⁽¹⁾

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT
V_{CC+}	Supply voltage ⁽²⁾		18	V
V_{CC-}			-18	
$V_{CC+} - V_{CC-}$			36	
V_{ID}	Differential input voltage ⁽³⁾		±30	V
V_I	Input voltage, either input ⁽²⁾⁽⁴⁾		±15	V
	Voltage from emitter output to V_{CC-}		30	V
	Voltage from collector output to V_{CC-}		50	V
	Duration of output short circuit ⁽⁵⁾		10	s
T_J	Junction temperature		148	°C
θ_{JA}	Package thermal impedance ⁽⁶⁾		97	°C/W
	Lead temperature 1,6 mm (1/16 in) from case for 10 s		260	°C
T_{stg}	Storage temperature range ⁽⁷⁾	-65	150	°C

- (1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values, unless otherwise noted, are with respect to the midpoint between V_{CC+} and V_{CC-} .
- (3) Differential voltages are at IN+ with respect to IN-.
- (4) The magnitude of the input voltage must never exceed the magnitude of the supply voltage or ±15 V, whichever is less.
- (5) The output may be shorted to ground or either power supply.
- (6) The package thermal impedance is calculated in accordance with JESD 51-7.
- (7) Long-term high-temperature storage and/or extended use at maximum recommended operating conditions may result in a reduction of overall device life. See http://www.ti.com/ep_quality for additional information on enhanced plastic packaging.

Recommended Operating Conditions

		MIN	MAX	UNIT
$V_{CC+} - V_{CC-}$	Supply voltage	3.5	30	V
V_I	Input voltage ($ V_{CC+} \leq 15$ V)	$V_{CC-} + 0.5$	$V_{CC+} - 1.5$	V
T_A	Operating free-air temperature range for Q temp	-40	125	°C
T_A	Operating free-air temperature range for M temp	-55	125	°C

LM211-EP DIFFERENTIAL COMPARATOR WITH STROBES

SLCS140A–DECEMBER 2002–REVISED MAY 2006

Electrical Characteristics

at specified free-air temperatures of Q and M temp ranges, $V_{CC+} = \pm 15\text{ V}$ (unless otherwise noted)

PARAMETER		TEST CONDITIONS	T_A (1)	MIN	TYP (2)	MAX	UNIT
V_{IO}	Input offset voltage (3)		25°C	0.7	3	mV	
			Full range		4		
I_{IO}	Input offset current (3)		25°C	4	10	nA	
			Full range		20		
I_{IB}	Input bias current	$V_O = 1\text{ V to }14\text{ V}$	25°C	75	100	nA	
			Full range		150		
$I_{IL(S)}$	Low-level strobe current (4)	$V_{(strobe)} = 0.3\text{ V}, V_{ID} \leq -10\text{ mV}$	25°C	-3		mA	
V_{ICR}	Common-mode input voltage range		Full range	13 to -14.5	13.8 to -14.7	V	
A_{VD}	Large-signal differential voltage amplification	$V_O = 5\text{ V to }35\text{ V}, R_L = 1\text{ k}\Omega$	25°C	40	200	V/mV	
I_{OH}	High-level (collector) output leakage current	$I_{(strobe)} = -3\text{ mA}, V_{OH} = 35\text{ V}, V_{ID} = 5\text{ mV}$	25°C	0.2	10	nA	
			Full range		0.5	μA	
V_{OL}	Low-level (collector-to-emitter) output voltage	$I_{OL} = 50\text{ mA}, V_{ID} = -5\text{ mV}, V_{CC+} = 4.5\text{ V}, V_{CC-} = 0, I_{OL} = 8\text{ mA}, V_{ID} = -6\text{ mV}$	25°C	0.75	1.5	V	
			Full range		0.23		0.4
I_{CC+}	Supply current from V_{CC+} , output low	$V_{ID} = -10\text{ mV}, \text{No load}$	25°C	5.1	6	mA	
I_{CC-}	Supply current from V_{CC-} , output high	$V_{ID} = 10\text{ mV}, \text{No load}$	25°C	-4.1	-5	mA	

- (1) Unless otherwise noted, all characteristics are measured with BALANCE and BAL/STRB open and EMIT OUT grounded. Full range is -40°C to 125°C for Q temp and -55°C to 125°C for M temp.
- (2) All typical values are at $T_A = 25^\circ\text{C}$.
- (3) The offset voltages and offset currents given are the maximum values required to drive the collector output up to 14 V or down to 1 V with a pullup resistor of $7.5\text{ k}\Omega$ to V_{CC+} . These parameters actually define an error band and take into account the worst-case effects of voltage gain and input impedance.
- (4) The strobe should not be shorted to ground; it should be current driven at -3 mA to -5 mA (see [Figure 13](#) and [Figure 27](#)).

Switching Characteristics

$V_{CC+} = \pm 15\text{ V}, T_A = 25^\circ\text{C}$

PARAMETER	TEST CONDITIONS		TYP	UNIT
Response time, low-to-high-level output	$R_C = 500\ \Omega$ to $5\text{ V},$	$C_L = 5\text{ pF}^{(1)}$	115	ns
Response time, high-to-low-level output	$R_C = 500\ \Omega$ to $5\text{ V},$	$C_L = 5\text{ pF}^{(1)}$	165	ns

- (1) The response time specified is for a 100-mV input step with 5-mV overdrive and is the interval between the input step function and the instant when the output crosses 1.4 V.

TYPICAL CHARACTERISTICS

Data at high and low temperatures are applicable only within the rated operating free-air temperature ranges of the various devices.

NOTE A: Condition 1 is with BALANCE and BAL/STRB open. Condition 2 is with BALANCE and BAL/STRB connected to V_{CC+}.

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

- A. All linear dimensions are in inches (millimeters).
 - B. This drawing is subject to change without notice.
 - C. Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed .006 (0,15) per end.
 - D. Body width does not include interlead flash. Interlead flash shall not exceed .017 (0,43) per side.
 - E. Reference JEDEC MS-012 variation AA.

D (R-PDSO-G8)

PLASTIC SMALL OUTLINE

- NOTES:
- All linear dimensions are in millimeters.
 - This drawing is subject to change without notice.
 - Publication IPC-7351 is recommended for alternate designs.
 - Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC-7525 for other stencil recommendations.
 - Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
